Beskrivning av kurs (design, ämnes- och professions integrering, etc.)

The course provides an overview of the diseases and conditions that make up the global burden of disease, the most important disease determinants, emerging epidemiological trends and their effects and underlying causes. This course should provide the basis for the global burden of disease, needed for further studies within the Master's programme.

The course must include the following topics:

- *Global burden of disease and how it differs depending on income levels, demography and geography.*
- *Infectious diseases worldwide.*
- *Non-communicable diseases.*
- *Mental health.*
- *Sexual and reproductive health and rights.*
- *Child health.*
- *The global burden of injuries.*
- *Food and nutrition security.*
- *Demographic, epidemiologic and nutritional transition.*
